Stanford Health Care delivers innovative treatments and exceptional outcomes for structural heart conditions

Stanford Medicine
March 05, 2021

At Stanford Health Care, we're advancing the standard of care for patients with structural heart disease, offering leading-edge diagnostics and interventional treatment options. Our expert faculty members are experienced to handle the most complex cases. We provide personalized, multidisciplinary care, offering the safest, least invasive approach possible.

Structural heart: Interventional modalities available at Stanford Health Care

Our expert interventional cardiologists have years of experience and training in the latest techniques, including:

Valve interventions

- Transcatheter aortic valve replacement (TAVR), including complex, alternative-access approaches and valve-in-valve TAVR
- Transcatheter mitral valve replacement (TMVR)
- Transcatheter tricuspid valve replacement (TTVR)
- Percutaneous mitral valve repair, including the MitraClip™ device
- Percutaneous tricuspid valve repair
- Balloon valvuloplasty

Other structural interventions

- Left atrial appendage closure, including the Watchman FLX™ device
- Closures for patent foramen ovale (PFO), atrial septal defect (ASD), and ventricular septal defect (VSD)
- Alcohol septal ablation for hypertrophic cardiomyopathy (HCM)

Stanford Health Care is a recognized center and the only hospital in the western U.S. to receive the Mitral Valve Repair Reference Center Award by the American Heart Association and Mitral Foundation for mitral valve repair surgery.

We welcome your referrals and encourage you to contact us.

Excellent outcomes for your patients with structural heart disease

Here's why Stanford Health Care is a worldwide referral center for structural heart disease:

- International reputation: Stanford Medicine physicians are consistently featured as key opinion leaders and invited speakers at international scientific meetings and are responsible for sharing their expertise by helping train other physicians across the world.
- National reputation: Stanford Health Care is ranked in the country's top 10 Cardiology and Heart Surgery programs and also nationally ranked in the top 8 for quality and safety.
- High-volume center: Studies show a survival benefit for patients who receive care from physicians who see many patients and perform procedures frequently. We treat an annual average of more than 400 cases as the highest volume structural heart center in Northern California.
- Excellent clinical outcomes: We have among the nation's best rates for low readmission, improved survival, and stroke prevention.
- Access to all available clinical trials: Our researchers participate in national and international clinical trials for the latest techniques and devices to diagnose and treat structural heart disease. We can offer your eligible patients access to the latest treatment options, which aren't widely available at other centers.

A trusted partner to offer your patients expert subspecialty cardiac care

Stanford Health Care partners with referring physicians to ensure the best possible care for patients who need specialized health services. When you refer your patients, you can expect:

- 24/7 access to our team: Our experts are available 24/7 for consultations via our dedicated MD line: 650.460.1009.
- Timely appointments: We offer your patients appointments within 24–48 hours for urgent referrals.
- Assistance with high-risk cases: Stanford Health Care offers a second opinion service for complex, high-risk patients who have been turned away from other centers.
- Multidisciplinary approach: We offer seamless care for patients with all types of comorbidities. Collaborating with you, we coordinate your patient's care with our renowned programs for heart failure, heart disease, arrhythmia, cardiac surgery, and other specialties.

For our high volumes, innovations, and expertise, we continue to be recognized as a top-ranked hospital and ranked in the top 10 for Cardiology & Heart Surgery programs.

During COVID-19, we are more committed than ever to ensuring the safety of our patients, many of whom are among the most vulnerable. Every care plan is personalized and includes a comprehensive patient evaluation. We welcome your referrals and encourage you to contact us at 650.460.1009 or email heartvalve@stanford.edu.
