Nick Love – *RGB#1* – Video

Muthuraman Alagappan – *Determining the decision-making accuracy of healthcare surrogates* – Poster

HISTORY OF MEDICINE AND THE MUSE

In 2002, Dr. Audrey Shafer organized Stanford's first official Medicine and the Muse Symposium. The symposium started as a humble gathering of interested members of the Stanford medical community. Now in its 15th year, this annual symposium has grown to become a prominent event on the medical school calendar. It attracts hundreds of attendees from all over campus and has featured some of the nation's most influential keynote speakers. Today, the symposium serves as a model for medical schools across the country and remains true to its original mission, to be a medical student driven event that celebrates the intersection of arts, humanities and medicine
