

Accordion

Accordions create areas of vertically stacked content that with a click of a heading, expand to show rolled-up content. Use Accordions to consolidate content and engage visitors by having them click to reveal what they seek.

Features

- Create up to 100 entries of collapsible content
- Tab headings, subheadings and color choices
- Choose a tab to be opened by default

Create areas of vertically collapsible content

Pro Tips

- Good for teasers and smaller groupings
- Effective in narrow columns
- Great for FAQs and definitions
- Use a bold heading color for critical items
- Do not place other collapsible components within
- Anchor links created for every entry
- Switch between entries using Preview mode
