

# Feature Box

Feature Boxes construct "featured" tiles of content – highly customizable panes that naturally lend themselves to highlighting, summarizing and leading users to further information.

## Features

- Multiple layout and heading options
- Choose images or icons to accompany text
- Customizable footer links
- Fully featured text editor & image cropping tool
- Vertical sizing control

*Win focus with vertically formatted imagery, heading, text and links*

## Pro Tips

- Leverage only a couple variations throughout your site
- Use icons in lieu of images, or none at all
- Use columns to constrain size – ideal for small-medium widths
- White background. Use with 'transparent' Panel Builders to see borders.
