

YouTube Player

The YouTube Player displays YouTube video from the Stanford Medicine YouTube channel or your other related content channel. This component is the 'window' to the video - all the video content controls are performed within YouTube.

Features

- Video Type
- Quick import using video ID
- Single and playlist options

Embed videos hosted on YouTube

Pro Tips

- Use YouTube for video content cleared for public consumption
- For multiple videos on a single page, try the playlist option
- YouTube has privacy, cc and analytic features
- Video scales to fit the column space
- The External iFrame component can work for video not on YouTube or MediaSpace
